Bioenergy: From Fields to Wheels

September 4 - 5, 2007
HUB-Robeson Center, University Park

Freedom Energy LLC Presentation Abstract for:

“IT’S THE FEEDSTOCK – TECHNOLOGY – LOGISTICSDUMMY”

Biodiesel production is a chemical processing business that has three key elements to the owner: 1) Feedstock selection 2) Technology for the process and 3) Logistics to get raw materials in and product out.

This presentation briefly wraps these variables into a touch of chemistry, market demand, pricing and an introduction to Freedom Energy, LLC as a producer with a regional plan.
