OPPORTUNITY - Graduate students have the opportunity to study at Iowa State University on June 3-15, 2009. This two-week intensive program provides advanced student training in the expanding fields of biobased product engineering, processing and product development. The focus is on innovative ideas and technologies that are an inherent component of complex “next generation” agriculture and engineering.

PROGRAM COST - There is no charge for tuition, housing or meals. While attending the program, students will reside in fully furnished apartments on campus. A dining plan will be provided for meals. Travel stipends up to $500 are available for certain students.

APPLICATION - An online application is available at our site, www.biorenew.iastate.edu/brtip. The completed application includes letter of interest, letter of recommendation, transcripts and research abstract that must be submitted by March 2 for consideration. Enrollment is limited, so do not delay.
